Introduction

We live in a time of great technological evolution and revolution. Innovation is not only upon us; it affects, even disrupts, us as marketers and as consumers of other businesses. Things are now very different; marketing is no longer what it used to be. The old fashioned 'interruptive' approach to capturing customer attention is declining. Partially due to all the distractions facing consumers, partially as the number of touchpoints between businesses and customers has exploded, but also because what customers want is changing too. As such it's time for businesses to establish a new relationship with them, Customers are more connected than ever before.

Important note: all Bookboon courses are, simply, straight to the point. It means that they far away from any theory & padding. The material is written by practitioners rather than researchers or scientists.
