Safety Audit & Site Inspection

Ref: 321517_127582 **Date:** 13 - 17 Jan 2025 **Location:** Barcelona (Spain) **Fees:** 4400 Euro

Introduction

This Safety Audit and Site Inspection training course will provide you with all the necessary skills and talents required to successfully audit and inspect an organization's health and safety performances. All Safety Management Systems SMS require a systematic and thorough assessment of how well and efficient and effective the various parts are working. It will develop the ability to examine an SMS critically and enable to identify strengths, weaknesses, and suggest measures for improvement.

"What you do not measure you cannot improve." The actual performance must match their stated intentions; otherwise, the documents and processes within the safety management system are meaningless. Safety audits and site inspections provide the final pieces of the health and safety management jigsaw, which, when effectively used, enable an organisation to control health and safety risks and promote an effective and robust management system.

Successful organisations are always striving for improvement, and well-structured audits and inspections provide the practical means through which this can be achieved.

Course Objectives of Safety Audit & Site Inspection

- Understand the legal background
- Appreciate the key elements of a safety management system
- Develop the skills necessary to undertake audits and site inspections successfully
- Understand the importance of and how to assess the safety culture of an organisation
