The background of the entire page features a grayscale checkered chessboard. In the foreground, several chess pieces are visible: a silver pawn on the left, a silver pawn in the center, and a large gold king piece on the right. Faint, concentric circles radiate from behind the king piece, creating a ripple effect across the background.

Advanced Data Analytics & Predictive Strategies with R

Ref: 3290_130145 **Date:** 07 - 11 Jul 2025 **Location:** Rome (Italy) **Fees:** 4200 **Euro**

Course Description

This intensive 5-day course equips data scientists and analysts with advanced R programming skills for predictive analytics and machine learning. Participants will learn cutting-edge techniques in data manipulation, visualization, and modeling using R's powerful ecosystem. Through hands-on projects and real-world datasets, attendees will gain practical experience in developing sophisticated predictive strategies.

Learning Objectives

- Master advanced R programming techniques for efficient data analysis
- Develop and implement complex predictive models using machine learning algorithms
- Create compelling data visualizations and interactive dashboards with R
- Apply statistical methods and time series analysis for accurate forecasting
- Optimize R code for improved performance and scalability

Course Modules

Day 1: Advanced R Programming and Data Manipulation

- Functional programming in R
- Advanced data manipulation with dplyr and data.table
- Efficient memory management and performance optimization
- Working with large datasets and databases in R

Day 2: Advanced Data Visualization and Reporting

- Creating complex ggplot2 visualizations
- Interactive visualizations with plotly and shiny
- Automated reporting with R Markdown and flexdashboard
- Geospatial visualization techniques

Day 3: Machine Learning and Predictive Modeling

- Supervised learning algorithms Random Forests, SVM, XGBoost
- Unsupervised learning techniques clustering, dimensionality reduction
- Model selection, validation, and hyperparameter tuning
- Ensemble methods and stacking

UK Training

PARTNER

Day 4: Time Series Analysis and Forecasting

- Advanced time series modeling with ARIMA and Prophet
- Multivariate time series analysis
- Anomaly detection in time series data
- Long short-term memory LSTM networks for sequence prediction

Day 5: Advanced Topics and Real-world Applications

- Natural Language Processing with R
- Network analysis and graph analytics
- Bayesian modeling and inference
- Deploying R models in production environments

Practical Wins for Participants

- Develop a portfolio-ready predictive modeling project
- Create an interactive dashboard for data exploration and visualization
- Implement a scalable machine learning pipeline for big data
- Design and deploy a real-time anomaly detection system

A graphic of a chessboard with several chess pieces. A large gold king piece is prominent in the foreground, with a silver pawn and a silver knight behind it. In the background, there are concentric white circles on a dark surface.
