## Advanced Certificate Governance, Risk and Compliance (GRC)

**Ref:** 321384\_131777 **Date:** 24 - 28 Feb 2025 **Location:** Amsterdam (Netherlands) **Fees:** 4200 Euro

### Course Introduction

Corporate/Public governance and risk management are critical. There is increasing attention being paid to corporate governance and risk management in business schools and among legislators.

There are different models for corporate governance and risk management, all of which aim to organize the relationship between stakeholders, between the organisation and stakeholders and controlling risks effectively. Governance, Risk Management, Compliance, and Effective Internal Controls' are all part of one system. And this is an important fact that, Unfortunately, not all companies have this avant-garde look towards this system.

This course includes discussions about board structure, committees, and their functions. It covers the process of managing risks in accordance with the Committee of Sponsoring Organizations of the Treadway Commission COSO requirements.

In addition, the course includes a discussion on internal controls. Those controls are used to respond to the risks in different areas of the corporation. Compliance is also covered per the latest developments.

### Course Objectives of Advanced Governance, Risk and Compliance GRC

- Define corporate/public governance and its connection to risk management and internal controls
- Discuss the roles and responsibilities of the various stakeholders in a private or public company.
- List the functions of corporate/public governance and identify the difference between the various models
- Identify the key areas of risk management and its external and internal environment changes
- Identify the correct controls to be implemented in a private or public sector company.

- Modern application through IT, software programs, and/or mobile applications
- Share top and recent 3 book titles in this field

### Abstract from the course book

The phrase “corporate governance” describes “the framework of rules, grc activities, relationships, systems and processes within and by which authority is exercised and controlled within corporations. It encompasses the mechanisms by which companies, and those in control, are held to account.”

Corporate governance is the broad term used to describe the processes, customs, policies, laws, and institutions that direct the organizations and corporations and risk management professionals in the way they act or administer and control their operations. It works to achieve the goal of the organization and manages the relationship among the stakeholders

Corporate governance means steering an organization in the desired direction by determining ways to make effective strategic decisions. It also deals with the accountability of the individuals through a mechanism that reduces the principal agent problem in the organization

Corporate Governance has a broad scope. It includes both social and institutional aspects. Corporate Governance encourages a trustworthy, as well as work environment. and Defines actions and controls. In other words, the heart of corporate governance and grc program is transparency, disclosure, business process, accountability, integrity, and acting with integrity. It is to be borne in mind that mere legislation does not ensure good governance. Good governance flows from ethical business practices and performance management even when there is no legislation.
