A large, stylized image of chess pieces on a checkered board. In the foreground, a gold king piece stands prominently next to a silver pawn. To the left, another silver pawn is visible. The background features concentric circles and a checkered pattern, suggesting a strategic or competitive theme.

Professional Certificate in Warehouse & Inventory Management

Ref: 3169_132863 **Date:** 11 - 15 Aug 2025 **Location:** London (UK) **Fees:** 4400 **Euro**

Course Description

This intensive 5-day course provides a comprehensive overview of warehouse and inventory management principles and practices. Participants will learn to optimize warehouse operations, implement effective inventory control strategies, and enhance supply chain efficiency. The course combines theoretical knowledge with practical applications to equip professionals with the skills needed to excel in modern logistics environments.

Learning Objectives

- Understand key warehouse management concepts and best practices
- Develop strategies for efficient inventory control and stock management
- Learn to implement warehouse layout and design optimization techniques
- Master the use of technology in warehouse and inventory management
- Enhance supply chain coordination and customer service capabilities
- Implement performance measurement and continuous improvement processes

Course Modules

Day 1: Fundamentals of Warehouse Management

- Introduction to warehouse operations and supply chain dynamics
- Warehouse types, functions, and key performance indicators
- Warehouse layout and design principles
- Material handling equipment and systems

Day 2: Inventory Management Essentials

- Inventory types and classification systems
- Demand forecasting and inventory planning
- ABC analysis and cycle counting techniques
- Inventory valuation methods and cost management

Day 3: Warehouse Operations and Processes

- Receiving, put-away, and storage strategies
- Order picking methods and technologies
- Packing, shipping, and distribution processes
- Returns management and reverse logistics

Day 4: Technology in Warehouse and Inventory Management

- Warehouse Management Systems WMS and their functionalities
- Barcode and RFID technologies for inventory tracking
- Automated Storage and Retrieval Systems AS/RS
- Data analytics and reporting for decision-making

Day 5: Performance Optimization and Best Practices

- Key performance metrics and benchmarking
- Lean warehouse management principles
- Safety and risk management in warehouse operations
- Continuous improvement strategies and change management

Practical Wins for Participants

- Develop a customized warehouse layout optimization plan
- Create an inventory control strategy to reduce costs and improve accuracy
- Design a performance measurement dashboard for warehouse operations
- Formulate an action plan to implement technology solutions in their organization
