The background of the entire page features a grayscale checkered chessboard. In the foreground, several chess pieces are visible: a silver pawn on the left, a silver pawn in the center, and a large gold king piece on the right. Behind the pieces, there are several concentric, light gray circles that radiate from the center, creating a ripple effect across the background.

Course Description

This intensive 5-day NDT Level II Technician course provides comprehensive training in advanced non-destructive testing techniques. Participants will gain in-depth knowledge and hands-on experience with ultrasonic, radiographic, magnetic particle, liquid penetrant, and visual testing methods. The course is designed to prepare technicians for Level II certification and enhance their inspection capabilities.

Learning Objectives

- Master advanced NDT techniques for UT, RT, MT, PT, and VT methods
- Develop skills in equipment calibration, test performance, and result interpretation
- Learn to prepare written NDT instructions for Level I technicians
- Understand relevant codes, standards, and acceptance criteria for various industries
- Gain practical experience through hands-on exercises and simulations

Course Modules

Day 1: Ultrasonic Testing UT

- Advanced UT principles and wave propagation
- Equipment calibration and optimization
- Flaw detection and sizing techniques
- Weld inspection procedures

Day 2: Radiographic Testing RT

- Radiation safety and protection
- Image quality and interpretation
- Digital radiography techniques
- Weld and casting radiography

Day 3: Magnetic Particle Testing MT

- Advanced magnetization techniques
- Equipment selection and calibration
