

Rotating Equipment Optimization & Reliability Improvement

Rotating Equipment Optimization & Reliability Improvement

Ref: 3271_137749 Date: 06 - 10 Oct 2025 Location: Toronto (Canada) Fees: 4700 Euro

Course Description

This intensive 5-day course focuses on advanced techniques for optimizing rotating equipment performance and implementing continuous reliability improvement CRI strategies. Participants will gain in-depth knowledge of reliability concepts, failure analysis, and maintenance optimization methods to enhance equipment uptime and reduce operational costs.

Learning Objectives

- Apply proven methodologies for rotating equipment optimization
- Implement effective reliability improvement strategies
- Analyze failure modes and develop targeted maintenance plans
- Optimize maintenance decisions using condition monitoring techniques
- Develop a continuous reliability improvement process

Course Modules

Day 1: Fundamentals of Reliability and Equipment Performance

- Introduction to reliability concepts and metrics
- Understanding the strategic importance of reliability
- Assessing current equipment performance
- Making informed strategic maintenance choices

Day 2: Reliability Modeling and Analysis

- Basic reliability modeling techniques
- Deterministic and probabilistic models
- Markov chains and Monte Carlo simulations
- · Case studies in reliability modeling

Day 3: Failure Analysis and Maintenance Strategies

- Understanding failure modes and patterns
- Weibull analysis for failure prediction
- Developing effective maintenance tasks
- Failure Modes and Effects Analysis FMEA

Day 4: Maintenance Optimization and Cost-Effectiveness

PARTNER PARTNER

Head Office: +44 7480 775 526 | 0 7401 177 335

- Risk assessment and equipment criticality
- Functional failure analysis
- Maintenance task selection and optimization
- Creating practical maintenance plans

Day 5: Continuous Reliability Improvement Implementation

- Establishing a CRI process
- Key Performance Indicators KPIs for reliability
- Root Cause Analysis RCA techniques
- Developing a reliability improvement action plan

Practical Wins for Participants

- Ability to reduce equipment downtime and maintenance costs
- Skills to implement data-driven maintenance strategies
- Techniques to optimize resource allocation for maintenance activities
- Methods to establish a culture of continuous reliability improvement
