Rotating Equipment Optimisation with Continuous Reliability Improvement (CRI)

Ref: 3271_137763 **Date:** 24 - 28 Feb 2025 **Location:** Cape Town (South Africa) **Fees:** 3300 Euro

Introduction:

Benchmarking studies on various oil refineries around the world have shown that rotating equipment accounts for more than 20% of all maintenance and inspection costs. Also, rotating equipment is often at key nodes of the process and is frequently critical to production. Therefore failure would lead to unacceptable downtime costs.

This program aims to provide delegates with a comprehensive understanding of how to use a combined predictive and preventive maintenance approach coupled with proper failure monitoring to achieve maximum reliability and performance from rotating equipment

Course Objectives Rotating Equipment Optimisation with Continuous Reliability Improvement CRI

- Apply the proven methodologies and templates which are introduced
- Focus on key areas of reliability
- Understand the nature of failure and how this affects the performance of rotating equipment
- Make the right maintenance choices for strategic equipment
- Reduce the impact of plant downtime
- Unlock the true potential of all of their people
