## Maintenance, Planning, Scheduling & Control Mastery Course

**Ref:** 3337\_138414 **Date:** 06 - 17 Oct 2025 **Location:** Toronto (Canada) **Fees:** 7900 **Euro**

### Course Description

This comprehensive 10-day course equips participants with advanced skills in maintenance planning, scheduling, and control. Attendees will learn to optimize asset performance, reduce downtime, and enhance operational efficiency through strategic maintenance management techniques. The course covers key concepts, practical tools, and industry best practices.

### Learning Objectives

- Develop effective maintenance strategies aligned with organizational goals
- Master techniques for efficient work order management and prioritization
- Implement robust preventive and predictive maintenance programs
- Optimize resource allocation and scheduling for maximum efficiency
- Utilize key performance indicators KPIs to measure and improve maintenance effectiveness

### Course Modules

#### Day 1: Foundations of Maintenance Management

- Introduction to maintenance management concepts
- Types of maintenance strategies
- Asset lifecycle management
- Maintenance organization structures

#### Day 2: Work Order Management

- Work order systems and processes
- Prioritization techniques
- Work order lifecycle
- Backlog management

#### Day 3: Maintenance Planning Fundamentals

- Planning principles and best practices
- Job plan development
- Resource estimation techniques
- Planning for different maintenance types

#### Day 4: Effective Maintenance Scheduling

A graphic of a chessboard with several chess pieces (king, queen, rook, knight, and pawns) in gold and silver. The text 'UK Training PARTNER' is overlaid on the board.

UK Training  
**PARTNER**

- Scheduling principles and methodologies
- Master scheduling techniques
- Short-term and long-term scheduling
- Constraint management in scheduling

### **Day 5: Preventive Maintenance Optimization**

- Developing PM programs
- PM task selection and frequency optimization
- Condition-based maintenance integration
- PM program auditing and improvement

### **Day 6: Predictive Maintenance Strategies**

- Introduction to predictive maintenance
- Condition monitoring techniques
- Data analysis for predictive maintenance
- Implementing a PdM program

### **Day 7: Maintenance Inventory and Procurement**

- Spare parts management
- Inventory optimization techniques
- Procurement strategies for maintenance
- Vendor management and partnerships

### **Day 8: Maintenance Performance Measurement**

- Key Performance Indicators KPIs for maintenance
- Benchmarking techniques
- Performance reporting and dashboards
- Continuous improvement strategies

### **Day 9: Maintenance Cost Control**

- Maintenance budgeting principles
- Cost estimation and control techniques
- Life cycle cost analysis
- Return on investment ROI calculations

### **Day 10: Computerized Maintenance Management Systems CMMS**

- CMMS functionality and selection
- Data management and analysis
- CMMS implementation best practices
- Leveraging CMMS for improved decision-making

A graphic of a chessboard with several chess pieces, including a king, queen, and pawns, arranged on it. The board is white and black, and the pieces are gold and silver.
