The background of the entire page features a chessboard with several chess pieces. In the foreground, a large gold king piece and a silver pawn are prominent. To the left, another silver pawn is visible. In the background, a gold pawn and another silver pawn are partially visible. Concentric circles emanate from behind the king piece, creating a ripple effect across the background.

International Energy Markets & Pricing: A Comprehensive Guide

Ref: 321374_139274 **Date:** 08 - 12 Sep 2025 **Location:** Cape Town (South Africa) **Fees:** 3300 Euro

Course Description

This intensive 5-day course provides a comprehensive overview of international energy markets and pricing mechanisms. Participants will gain in-depth knowledge of global energy dynamics, market structures, and pricing strategies across oil, gas, and renewable energy sectors. The course combines theoretical frameworks with practical case studies to equip professionals with the tools needed to navigate the complex world of energy markets.

Learning Objectives

- Understand the fundamentals of global energy market structures and dynamics
- Analyze pricing mechanisms and strategies in oil, gas, and renewable energy markets
- Evaluate the impact of geopolitical factors and regulations on energy pricing
- Develop skills in risk management and hedging strategies for energy markets
- Assess the role of emerging technologies and sustainability in shaping future energy markets

Course Modules

Day 1: Introduction to Global Energy Markets

- Overview of energy market structures and key players
- Supply and demand dynamics in global energy markets
- Energy market geopolitics and regulatory frameworks
- Introduction to energy pricing fundamentals

Day 2: Oil Market Dynamics and Pricing

- Crude oil benchmarks and pricing mechanisms
- Factors influencing oil price volatility
- OPEC's role in global oil markets
- Oil futures and derivatives markets

Day 3: Natural Gas and LNG Markets

- Global natural gas market structures and regional differences
- LNG pricing mechanisms and contracts
- Gas hub development and spot market pricing
- Impact of shale gas on global markets

A graphic of a chessboard with several chess pieces (king, queen, rook, knight, and pawns) in gold and silver. The text 'UK Training PARTNER' is overlaid on the board.

Day 4: Renewable Energy Markets and Pricing

- Renewable energy market structures and support mechanisms
- Pricing strategies for solar, wind, and other renewables
- Grid parity and the economics of renewable energy
- Carbon pricing and its impact on energy markets

Day 5: Risk Management and Future Trends

- Energy market risk assessment and management strategies
- Hedging techniques in energy markets
- Emerging technologies and their impact on energy pricing
- Future trends in global energy markets and pricing

Practical Wins for Participants

- Develop a comprehensive understanding of global energy market dynamics
- Acquire skills to analyze and forecast energy price trends
- Learn effective risk management strategies for energy market operations
- Gain insights into the future of energy markets and pricing mechanisms
