Finance & Accounting Essentials for Oil & Gas Professionals

Ref: 321412_139568 **Date:** 16 – 20 August 2027 **Location:** London (UK) **Fees:** 6100 GBP

Why This Course

The oil and gas industry operates in one of the most complex financial environments in the world—characterized by capital-intensive projects, price volatility, joint ventures, regulatory scrutiny, and long investment cycles. Financial and accounting decisions in this sector require not only strong technical knowledge, but also a deep understanding of industry-specific practices and risks.

The **Oil & Gas Finance and Accounting Excellence Program** is a comprehensive five-day course designed for finance professionals, accountants, analysts, and managers working in or with the energy sector. The program provides a practical, end-to-end understanding of financial management across upstream, midstream, and downstream operations.

By combining industry-specific accounting standards with applied financial analysis, budgeting, and investment evaluation techniques, the course equips participants to make informed, strategic financial decisions in a highly dynamic industry.

What You'll Learn and Practice

By the end of this program, participants will be able to:

- Apply oil and gas-specific accounting principles and financial reporting standards
- Analyze financial statements and industry-specific KPIs with confidence
- Evaluate exploration, production, and downstream projects financially
- Develop budgets, forecasts, and capital investment analyses for oil and gas operations
- Understand financial risk management strategies and their business implications
- Apply cost allocation and performance measurement techniques across the value chain

The Program Flow 5-Day Structure

Day 1 - Introduction to Oil & Gas Finance

- Overview of the oil and gas value chain and financial challenges
- Industry accounting standards and regulatory frameworks
- Understanding financial statements in oil and gas companies
- Key performance indicators for the energy sector

Day 2 - Upstream Accounting & Economics

- Exploration and production accounting practices
- Reserve estimation, valuation, and economic impact
- Joint venture accounting and cost recovery mechanisms
- Production sharing agreements and fiscal regimes

Day 3 - Midstream & Downstream Financial Management

- Pipeline, transportation, and storage accounting
- Refinery economics and downstream cost structures
- Trading activities and financial risk management
- Inventory valuation methods in energy operations

Day 4 - Capital Budgeting & Investment Analysis

- Project evaluation and capital budgeting techniques
- Risk analysis and uncertainty in oil and gas investments
- Portfolio management across multiple assets
- Financial aspects of mergers and acquisitions in the energy sector

Day 5 - Financial Planning & Performance Management

- Budgeting and forecasting for oil and gas operations
- Cost allocation, transfer pricing, and internal charging
- Performance measurement, benchmarking, and variance analysis
- Financial risk management and value protection strategies

Individual Impact

Participants will leave the program with:

- Stronger confidence in interpreting oil and gas financial statements
- Practical skills to evaluate and recommend capital investment projects
- Improved budgeting and forecasting capabilities tailored to energy operations
- Enhanced understanding of financial risk in volatile market conditions
- The ability to support strategic decision-making in oil and gas organizations

Organizational Impact

Organizations will benefit through:
