A large, detailed image of chess pieces on a checkered board. In the foreground, a gold king piece stands prominently on a light square. To its left, a silver pawn is on a dark square. Further back, another silver pawn is visible on a light square. The background features concentric circles radiating from behind the king piece, creating a sense of depth and focus.

Safety Technology & Risk Management: Mastering Hazard Control

Ref: 321449_140106 **Date:** 14 - 18 Jul 2025 **Location:** Kuala Lumpur (Malaysia) **Fees:** 4200 Euro

Course Description

This comprehensive 5-day course equips professionals with advanced knowledge and skills in safety technology and risk management. Participants will learn to identify hazards, assess risks, and implement effective control measures in complex industrial environments. The course covers cutting-edge safety technologies, risk assessment techniques, and strategies for creating a robust safety culture.

Learning Objectives

- Apply principles of hazard identification and risk assessment to processes and machinery
- Understand reliability concepts and utilize failure tracing methods
- Demonstrate practical understanding of quantitative risk assessment techniques
- Develop and implement effective control methods based on risk evaluation
- Identify requirements for safe work systems and relevant international standards
- Promote a proactive approach to hazard analysis and safety management

Course Modules

Day 1: Fundamentals of Safety Technology

- Introduction to safety engineering and major industrial disasters
- The safety system process and hazard identification techniques
- Criteria for risk tolerability and hazard control strategies
- Safety standards, codes, and regulations national and international

Day 2: Advanced Risk Assessment Techniques

- Safety management systems and lifecycle approach
- Process, workplace, and equipment risk assessment methodologies
- Task-based risk assessment and human factors analysis
- Introduction to HAZOP Hazard and Operability Study

Day 3: Machinery and Work Equipment Safety

- Machinery hazard identification and accident prevention methods
- Failure modes, effects analysis FMEA, and software safety
- Human factors in safety analysis and performance optimization
- Case studies and practical HAZOP examples

A graphic of a chessboard with several chess pieces, including a king, queen, and pawns, arranged on the board. The text 'UK Training PARTNER' is overlaid on the image.

Day 4: Reliability Technology and Protective Systems

- Types and causes of failures in industrial systems
- Maintenance strategies and inspection regimes
- Design and reliability of control and protective systems
- High Integrity Protective Systems HIPS and Safety Integrity Levels SIL

Day 5: Consequence Analysis and Emergency Planning

- Mechanics of fire, explosion, and toxic releases
- Dispersion modeling and quantitative risk assessment
- Event Tree Analysis ETA and emergency response planning
- Integration of safety technologies in risk management strategies

Practical Wins for Participants

- Develop a comprehensive hazard identification and risk assessment plan for a specific industrial process
- Create a customized safety management system framework aligned with international standards
- Design a reliability-centered maintenance program for critical equipment
- Formulate an emergency response plan integrating advanced safety technologies

A graphic of a chessboard with several chess pieces. A large gold king piece is in the foreground, with a silver pawn and a silver knight behind it. In the background, there are concentric circles emanating from a point on the board.
