## Information Security & Cyber Security

**Ref:** 321492\_140377 **Date:** 03 - 07 Feb 2025 **Location:** Geneva (Switzerland) **Fees:** 4700 Euro

### Introduction

The course provides delegates with a high-level understanding of how to protect an organization from cyber-attacks and provides an overview of the threats facing organizations and the basics of Information Security techniques and controls to help protect against those threats.

You will gain a global perspective of the challenges of designing a secure system, touching on all the cyber roles needed to provide a cohesive security solution. Through the lecture, you will learn about current threat trends across the Internet and their impact on organizational security. You will review standard cybersecurity terminology and compliance requirements, examine sample exploits, and gain hands-on experience mitigating controls.

### Training Objectives of Information Security & Cyber Security

- Understand the cyber threats and vulnerabilities in organisations
- Understand the basic Information Security techniques and controls to protect organisations from cyber attacks
- Understand the basics of an Information Security Management System ISMS
- Explore different data protection principles
- Explore social engineering threats, methods, and techniques
- Examine software vulnerabilities and security solutions for reducing the risk of exploitation
- Identify physical security controls and the relationship between physical and IT security

### Information Security & Cyber Security Training Outline

#### Day 1

##### Cybersecurity Awareness

- What is security?
- Confidentiality, integrity, and availability
- Security baselining
- Security concerns: Humans
- Types of threats
- Security controls
- What is hacking?

A graphic of a chessboard with several chess pieces (a king, a queen, a rook, and a pawn) on it. The board is white and black, and the pieces are gold and silver. The text 'UK Training PARTNER' is overlaid on the right side of the board.

UK Training  
**PARTNER**

- Risk management
- Data in motion vs. data at rest

### Network Discovery

- Networking review
- Discovery, footprinting, and scanning
- Common vulnerabilities and exposures
- Security policies
- Vulnerabilities.

### Day 2

#### Security Architecture

- Security architecture
- Network devices
- Network zones
- Network segmentation
- Network Address Translation
- Network Access Control.

#### Data Security

- Cryptography
- Principles of permissions
- Steganography
- Module review

### Day 3

#### Identity Management

- What is identity management?
- Personally identifiable information
- Authentication factors
- Directory services
- Password policies
- Cracking passwords
- Password assessment tools
- Password managers
- Group accounts
- Service accounts
- Federated identities
- Identity as a Service
- Module review

#### Network Hardening

UK Training

**PARTNER**

- Limiting remote admin access
- Administrative access
- Simple Network Management Protocol
- Network segmentation
- Limiting physical access
- Establishing secure access
- Network devices
- Fundamental device protection summary
- Traffic filtering best practices.

## Day 4

### Software Security

- Software engineering
- Security guidelines
- Software vulnerabilities
- Environment Monitoring
- Monitoring/logging benefits.
- Metrics

### Physical Security

- What is physical security?
- Defense in depth
- Types of physical security controls
- Device security
- Human security
- Security policies
- Equipment tracking
- Module review

## Day 5

### Incident Response

- Disaster types
- Incident investigation tips
- Business continuity planning
- Disaster recovery plan
- Forensic incident response
- Module review

### Trends in Cybersecurity

- Cybersecurity design constraints
- Cyber driving forces
- How connected are you?
