

# Well Testing and Pressure Transient Analysis Masterclass

Oil & Gas Engineering  
Sharm El-Sheikh (Egypt)  
31 Aug - 04 Sep 2025

UK Training

# PARTNER

The background of the entire page features a grayscale checkered chessboard. In the foreground, several chess pieces are visible: a silver pawn on the left, a silver pawn in the center, and a large gold king piece on the right. Faint, concentric circles radiate from behind the king piece, creating a ripple effect across the background.

## Well Testing and Pressure Transient Analysis Masterclass

**Ref:** 321580\_141276 **Date:** 31 Aug - 04 Sep 2025 **Location:** Sharm El-Sheikh (Egypt) **Fees:** 3700 Euro

### Course Description

This intensive 5-day course provides a comprehensive understanding of well testing and pressure transient analysis techniques. Participants will learn to design, conduct, and interpret various well tests to characterize reservoirs and evaluate well performance. The course covers both theoretical concepts and practical applications, with hands-on exercises using real-world data.

### Learning Objectives

- Understand the principles and applications of pressure transient testing
- Design and execute various well tests for different reservoir scenarios
- Interpret pressure transient data using analytical and numerical methods
- Apply advanced techniques for complex reservoir systems and unconventional resources
- Evaluate well and reservoir performance using pressure transient analysis

### Course Modules

#### Day 1: Fundamentals of Well Testing

- Introduction to well testing and pressure transient analysis
- Fluid flow in porous media and well testing theory
- Types of well tests and their applications
- Well test design and execution

#### Day 2: Pressure Transient Analysis Techniques

- Analytical solutions for various flow regimes
- Type curve analysis and diagnostic plots
- Pressure derivative analysis
- Wellbore storage and skin effects

#### Day 3: Advanced Well Test Interpretation

- Heterogeneous and naturally fractured reservoirs
- Horizontal and multi-lateral well testing
- Interference and pulse testing
- Hydraulically fractured well analysis

#### Day 4: Specialized Tests and Applications

The logo for UK Training Partner features the text 'UK Training' in a small, black sans-serif font above the word 'PARTNER' in a large, bold, black sans-serif font. The background of the logo is a stylized chessboard with several chess pieces (a king, a queen, and a pawn) in gold and silver, set against a backdrop of concentric circles.

- Drill stem tests and formation testing
- Injection well testing and falloff analysis
- Multi-layer and commingled reservoir testing
- Gas well testing and analysis

## **Day 5: Integration and Practical Applications**

- Integrating well test data with other reservoir characterization methods
- Uncertainty analysis and quality control
- Case studies and real-world examples
- Advanced software applications for pressure transient analysis

## **Practical Wins for Participants**

- Ability to design and interpret well tests for various reservoir scenarios
- Improved skills in reservoir characterization and performance evaluation
- Enhanced decision-making capabilities for field development and management
- Proficiency in using modern well test analysis software and techniques
