Decision Analysis for Operation & Maintenance Professionals

Ref: 321585_141331 **Date:** 21 - 25 Jul 2025 **Location:** Los Angeles (USA) **Fees:** 5700 **Euro**

Course Description

This intensive 5-day course equips operation and maintenance professionals with advanced decision analysis skills. Participants will learn to apply structured decision-making techniques, utilize decision trees, and incorporate risk assessment in their daily operations. The course combines theoretical concepts with practical applications, ensuring immediate value in the workplace.

Learning Objectives

- Apply decision analysis frameworks to complex O&M scenarios
- Construct and interpret decision trees for operational choices
- Integrate risk assessment techniques into maintenance planning
- Utilize probabilistic modeling for equipment reliability analysis
- Implement value of information concepts in maintenance strategies

Course Modules

Day 1: Foundations of Decision Analysis in O&M

- Introduction to decision analysis principles
- Structuring O&M decisions
- Framing problems in maintenance contexts
- Decision quality framework for operations

Day 2: Decision Trees and Probabilistic Modeling

- Constructing decision trees for maintenance choices
- Probability assessment in operational uncertainties
- Expected value calculations for equipment decisions
- Sensitivity analysis in O&M contexts

Day 3: Risk Assessment and Management in O&M

- Risk identification in operational environments
- Quantitative risk analysis techniques
- Risk mitigation strategies for maintenance
- Integrating risk in decision-making processes

Day 4: Value of Information in Maintenance Decisions

A graphic of a chessboard with several chess pieces (king, queen, rook, knight, and pawns) in gold and silver. The text 'UK Training PARTNER' is overlaid on the right side of the board.

UK Training
PARTNER

- Concepts of perfect and imperfect information
- Calculating value of information for maintenance data
- Applying VOI to condition monitoring decisions
- Information gathering strategies in O&M

Day 5: Advanced Topics and Practical Applications

- Multi-criteria decision analysis for O&M
- Group decision-making in operational teams
- Cognitive biases in maintenance decisions
- Case studies and real-world applications

Practical Wins for Participants

- Improved ability to make data-driven maintenance decisions
- Enhanced risk management in daily operations
- Increased efficiency in resource allocation for maintenance
- Better justification of O&M investments to management
