Purchase Logistic insectary

Ref: 321604_141634 **Date:** 13 - 17 Jan 2025 **Location:** Brussels (Belgium) **Fees:** 4400 **Euro**

Introduction

Supply chain management involves end-to-end management of various functions/processes in the transformation of raw material into finished products delivered to customers. The purchasing function of the supply chain has evolved into a cost-saving function.

Cost-saving in this process is achieved through process, product and supplier relationship developments. Purchasing has become a core competency for any organisation. Logistics management helps meet customer expectations through planning, execution and control of movement and storage of goods, information and services from origin to destination.

Course Objectives of Purchase Logistic insectary

- Detailed understanding and knowledge various supply chain functions, specifically purchasing, logistics and material management
- the required skill and understanding to work with advanced supply chain management systems to improve the efficiency and productivity of supply chain operations
