

# SQL Server High Availability & Disaster Recovery Mastery

IT & IT Engineering  
Düsseldorf (Germany)  
29 Sep - 03 Oct 2025

UK Traininig

# PARTNER

A close-up photograph of chess pieces on a checkered board. In the foreground, a large, ornate gold king piece stands prominently. To its left, a smaller silver pawn is visible. Further back, another silver pawn is positioned. The background features concentric circles, creating a sense of depth and focus on the king piece.

## SQL Server High Availability & Disaster Recovery Mastery

**Ref:** 321638\_142705 **Date:** 29 Sep - 03 Oct 2025 **Location:** Düsseldorf (Germany) **Fees:** 4200 Euro

### Course Description

This comprehensive 5-day course equips database professionals with advanced skills to design, implement, and manage high availability and disaster recovery solutions for SQL Server. Participants will gain hands-on experience with AlwaysOn Availability Groups, Failover Cluster Instances, and various replication techniques to ensure continuous database operations and minimize downtime in critical business environments.

### Learning Objectives

- Understand SQL Server high availability and disaster recovery concepts and architectures
- Implement and manage AlwaysOn Availability Groups for enhanced database availability
- Configure and maintain Failover Cluster Instances for SQL Server
- Design and implement effective backup and recovery strategies
- Master various replication techniques for data distribution and disaster recovery

### Course Modules

#### Day 1: Introduction to SQL Server High Availability and Disaster Recovery

- HA/DR concepts and terminology
- SQL Server HA/DR feature overview
- Assessing business requirements for HA/DR
- Planning HA/DR architectures

#### Day 2: Implementing AlwaysOn Availability Groups

- AlwaysOn Availability Groups architecture
- Configuring and managing availability groups
- Implementing read-scale availability groups
- Monitoring and troubleshooting availability groups

#### Day 3: Failover Cluster Instances and Windows Server Failover Clustering

- Failover Clustering concepts and architecture
- Installing and configuring a Failover Cluster Instance
- Managing and maintaining FCIs
- Implementing multi-subnet clustering

A graphic of a chessboard with several chess pieces (king, queen, rook, knight, and pawns) in gold and silver. The text 'UK Training PARTNER' is overlaid on the board.

## Day 4: Backup and Recovery Strategies

- Designing effective backup strategies
- Implementing advanced backup techniques
- Point-in-time recovery and log shipping
- Database snapshots and recovery models

## Day 5: Replication and Additional HA/DR Techniques

- SQL Server replication architecture and types
- Implementing transactional and merge replication
- Database mirroring and log shipping
- Combining HA/DR technologies for comprehensive solutions

## Practical Wins for Participants

- Ability to design and implement robust HA/DR solutions for SQL Server environments
- Hands-on experience with configuring and managing AlwaysOn Availability Groups
- Proficiency in implementing and maintaining Failover Cluster Instances
- Skills to optimize backup and recovery strategies for minimal data loss and downtime

A graphic of a chessboard with several chess pieces. A large gold king piece is in the foreground, with a silver pawn and a silver knight behind it. In the background, there are concentric circles emanating from a point on the board.
