## IT Project Management

**Ref:** 321713\_144645 **Date:** 27 - 31 Jan 2025 **Location:** London (UK) **Fees:** 4400 **Euro**

### Introduction

This course relies on individual and group exercises aimed at helping participants learn all the critical activities related to contract management. The course also features several case studies and role-plays by participants, followed by discussions. In addition, this course incorporates pre-and post-testing.

### Course Objectives

- Manage information technology projects using different project management methodologies
- Prepare the business case of IT projects to ensure justification and feasibility
- Relate project requirements and objectives to stakeholders' needs in a clear and compelling manner
- Explain fundamental project planning activities and set realistic, measurable objectives using predictive and agile methodologies
- Identify the role of the project manager during the design phase of the project
- Outline the activities during the execution phase of a project and establish an effective control process to ensure execution and delivery are in line with the project plans

### Course Outlines

#### Day1

##### Overview of IT Project Management

- How are IT projects different?
- Risks associated with IT projects
- System development life cycle
  - Waterfall model
  - Incremental model
  - Basic iterative model
  - Agile development model

#### Day 2

##### Project Concept

A graphic of a chessboard with several chess pieces (a king, a queen, a rook, and a knight) on it. The board is white and black, and the pieces are gold and silver. The text 'UK Training PARTNER' is overlaid on the board.

UK Training  
**PARTNER**

- Developing the business case
- Identifying stakeholders
- Establishing conceptual solutions
- Project charter

### **Project Requirements**
