Certified Management Accountant (CMA) Comprehensive Course

Ref: 321814_171908 **Date:** 23 – 27 November 2026 **Location:** Seattle, Washington (USA) **Fees:** 5900 GBP

Why This Course

In today's competitive financial landscape, mastery of management accounting and strategic financial management is critical for career advancement. This intensive 1-week Certified Management Accountant CMA course equips finance professionals with the knowledge and practical skills needed to excel in financial planning, performance analytics, and decision-making. Participants will gain hands-on experience aligned with CMA exam standards and real-world financial challenges.

What You'll Learn and Practice

By participating in this course, you will:

- Master financial planning, budgeting, and forecasting techniques.
- Develop proficiency in performance management and cost analysis.
- Understand external financial reporting and internal control frameworks.
- Gain expertise in strategic financial management and decision-making.
- Enhance analytical skills using technology and data analytics.
- Prepare effectively for the CMA examination through practice questions and case studies.

Program Flow

Day 1: Introduction to Management Accounting

- Overview of management accounting principles
- External financial reporting decisions
- Financial statement analysis
- Differences between U.S. GAAP and IFRS

Day 2: Planning, Budgeting, and Forecasting

- Strategic planning and analysis
