Mastering Project Management with PRINCE2 Methodology

Ref: 322494_201087 **Date:** 30 August – 3 September 2027 **Location:** Vienna (Austria) **Fees:** 5200 GBP

Why This Course

PRINCE2 is a widely used project management methodology that provides a structured approach for managing projects with clear governance, defined roles, controlled stages, and strong business justification. It helps organizations manage projects more consistently by focusing on planning, risk control, quality, progress monitoring, and effective decision-making.

This intensive 1-week PRINCE2 Project Management Training program equips participants with the knowledge and practical skills needed to apply PRINCE2 principles, themes, and processes across different project environments. The course covers project initiation, business case development, project planning, roles and responsibilities, stage control, product delivery, risk and issue management, quality control, progress reporting, project closure, and tailoring PRINCE2. Through practical exercises, case studies, and mock tests, participants will also build readiness for PRINCE2 Foundation and Practitioner certification exams.
