Agile Project Management Practitioner Certification Course

Ref: 322503_201485 **Date:** 15 – 19 March 2027 **Location:** Seattle, Washington (USA) **Fees:** 5900 GBP

Why This Course

Agile project management helps organizations deliver value faster, respond to change more effectively, and improve collaboration between teams and stakeholders. In complex project environments, agile approaches provide flexibility, transparency, and continuous feedback, allowing teams to adapt plans while keeping focus on business outcomes.

This intensive 1-week Agile Project Management Practitioner Training program prepares participants to apply agile principles, frameworks, and practices in real project settings while building readiness for the Agile Project Management Practitioner certification exam. The course covers agile philosophy, Scrum, Kanban, XP, agile planning, user stories, estimation, backlog management, iteration control, quality assurance, agile leadership, scaling agile, risk management, value delivery, vendor management, and certification preparation. Through practical exercises and mock tests, participants will gain confidence to lead agile projects and support high-performing teams.
