Project Management Professional (PMP) Certification Prep

Ref: 322529_202666 **Date:** 2 – 6 August 2027 **Location:** Barcelona (Spain) **Fees:** 5200 GBP

Why This Course

The PMP certification is one of the most recognized credentials for project management professionals. It demonstrates strong knowledge of project management principles, structured delivery practices, leadership skills, and the ability to manage projects across predictive, Agile, and hybrid environments.

This intensive 5-day PMP Certification Preparation Training program equips participants with the knowledge, tools, and exam confidence needed to prepare for the PMP certification. The course covers PMBOK Guide concepts, project lifecycle management, integration, scope, schedule, cost, quality, resources, communications, stakeholders, procurement, risk, change control, Agile principles, hybrid approaches, and exam strategies. Through practical exercises, real-world scenarios, and practice questions, participants will strengthen both certification readiness and professional project management capability.

What You'll Learn and Practice

By joining this program, you will:

- Master PMBOK Guide knowledge areas and process groups.
- Understand project management principles, terminology, and lifecycle approaches.
- Develop project charters and initiation documents.
- Create Work Breakdown Structures and project plans.
- Apply schedule management and critical path techniques.
- Develop cost estimates, budgets, and quality plans.
- Manage project resources and support team development.
- Apply communication and stakeholder engagement techniques.
- Understand procurement management and vendor coordination.
- Monitor performance and manage project changes.
- Identify, assess, and mitigate project risks.
- Apply Agile and hybrid project management approaches.
- Use PMP exam strategies, practice questions, and final review techniques.

The Program Flow

Day 1: Project Management Framework and Initiation

- Understand project management concepts and professional terminology.
- Explore project lifecycles and organizational influences.
- Apply project integration management concepts.
- Develop project charters that define objectives, authority, and business value.
- Identify key stakeholders and project success factors.

Day 2: Project Planning

- Apply scope management and create Work Breakdown Structures.
- Develop project schedules using activity sequencing and critical path method.
- Apply cost management, budgeting, and baseline planning.
- Plan project quality requirements and control approaches.
- Connect scope, schedule, cost, and quality into a realistic project management plan.

Day 3: Project Execution and Team Leadership

- Manage project resources and support team development.
- Apply leadership techniques for project team performance.
- Develop communication management approaches.
- Engage stakeholders and manage expectations.
- Understand procurement management and supplier coordination.

Day 4: Monitoring, Controlling, and Closing

- Monitor project performance and progress.
- Apply integrated change control processes.
- Identify, analyze, and mitigate project risks.
- Track issues, changes, and corrective actions.
- Conduct project closure and capture lessons learned.

Day 5: Agile and Exam Preparation

- Understand Agile project management principles.
- Apply hybrid approaches in project management environments.
- Review PMP exam structure, question styles, and preparation strategies.
- Complete practice exams and analyze answers.
- Conduct final review of key concepts and exam readiness areas.

Individual Impact

- Build confidence in managing complex projects effectively.
- Strengthen project planning, leadership, risk, and stakeholder management skills.
- Improve ability to work across predictive, Agile, and hybrid project environments.
- Gain practical understanding of PMP exam concepts and question approaches.
- Increase readiness to pursue the PMP certification exam.

Work Impact

- Improve project delivery through stronger planning, control, and leadership.
- Strengthen alignment between projects and organizational strategy.
- Improve stakeholder engagement, communication, and project governance.
- Reduce project risks through better monitoring and mitigation practices.
- Support higher project success rates through recognized best practices.

Training Methodology

This program combines PMP exam preparation with practical project management application through:

- Instructor-led review of PMBOK Guide concepts.
- Project charter, WBS, schedule, budget, and risk exercises.
- Scenario-based discussions and real-world project examples.
- Leadership, communication, and stakeholder engagement activities.
- Agile and hybrid project management practice.
- PMP-style questions, practice exams, and answer review sessions.

Beyond the Course

Upon completion, participants will be able to:

- Lead and manage complex projects more effectively.
- Apply PMBOK Guide principles and project management best practices.
- Use Agile and hybrid approaches when appropriate.
- Improve team leadership and stakeholder communication.
- Align projects with organizational strategy and business value.
- Approach the PMP certification exam with stronger preparation and confidence.
