Ref: 322538_203118 **Date:** 16 – 20 August 2027 **Location:** London (UK) **Fees:** 5400 GBP

Why This Course

Agile project management helps organizations deliver value faster, respond to change, improve collaboration, and increase customer satisfaction. For project professionals, the PMI-ACP certification demonstrates strong knowledge of Agile principles, multiple Agile methodologies, and practical techniques for leading adaptive projects successfully.

This intensive 1-week PMI Agile Certified Practitioner Training program prepares participants for the PMI-ACP certification exam while strengthening practical Agile project management skills. The course covers Agile principles, Scrum, Kanban, XP, value-driven delivery, user stories, backlog management, estimation, prioritization, release planning, team performance, stakeholder engagement, risk management, continuous improvement, Agile metrics, and exam preparation. Through practical exercises, case studies, and exam simulations, participants will build the confidence to lead Agile projects and prepare effectively for certification.
