Monitoring & Evaluation for Governance: Enhancing Oversight

Ref: 322571_204566 **Date:** 14 – 18 December 2026 **Location:** Kuala Lumpur (Malaysia) **Fees:** 4900 GBP

Why This Course

Monitoring and evaluation are essential for improving the effectiveness, transparency, and accountability of governance programs. Strong M&E systems help organizations track progress, measure results, understand what is working, identify gaps, and make better decisions based on reliable evidence.

This comprehensive 1-week Monitoring and Evaluation for Governance Training program equips participants with practical skills to design, implement, and use M&E systems in governance contexts. The course covers M&E fundamentals, governance systems, Theory of Change, logical frameworks, results chains, governance indicators, data collection, data quality, analysis, reporting, participatory approaches, impact evaluation, technology, ethics, and accountability. Through practical exercises and real-world examples, participants will learn how to create meaningful M&E frameworks that support stronger governance outcomes.

What You'll Learn and Practice

By joining this program, you will:

- Understand the fundamentals of M&E in governance contexts.
- Recognize the role of M&E in improving governance and accountability.
- Identify key challenges in governance-related M&E.
- Design M&E frameworks for governance programs.
- Develop Theory of Change models, logical frameworks, and results chains.
- Select suitable M&E approaches based on program needs.
- Engage stakeholders in M&E design and implementation.
- Develop relevant governance indicators.
- Apply SMART criteria for indicator development.
- Choose appropriate data collection methods and tools.
- Ensure data quality, reliability, and ethical use.
- Analyze and interpret M&E data.
- Report and communicate findings clearly.
- Use M&E results to improve program outcomes and decision-making.

The Program Flow

Day 1: Introduction to M&E for Governance

- Understand core M&E concepts and principles.
- Explore governance systems and why they matter.
- Identify how M&E strengthens transparency, accountability, participation, and performance.
- Review common challenges in governance M&E.
- Connect governance outcomes with evidence-based program improvement.

Day 2: Designing M&E Frameworks

- Develop Theory of Change models for governance programs.
- Build logical frameworks and results chains.
- Select appropriate M&E approaches for different governance initiatives.
- Define outputs, outcomes, impact, assumptions, and risks.
- Engage stakeholders in M&E design to improve ownership and relevance.

Day 3: Developing Governance Indicators

- Understand different types of governance indicators.
- Apply SMART criteria to create meaningful indicators.
- Design indicators for participation, transparency, accountability, institutional performance, service delivery, and policy outcomes.
- Select data collection methods and tools.
- Establish data quality and reliability measures.

Day 4: Implementing M&E Systems

- Establish practical M&E systems for governance programs.
- Define roles, responsibilities, data flows, and reporting cycles.
- Analyze and interpret M&E data.
- Prepare reports that communicate findings clearly.
- Use M&E results for learning, decision-making, and program improvement.

Day 5: Advanced Topics and Best Practices

- Explore impact evaluation approaches for governance initiatives.
- Apply participatory M&E methods.
- Use technology to support governance M&E data collection, analysis, and reporting.
- Address ethics, accountability, confidentiality, and responsible data use.
- Review best practices for sustainable M&E systems.

Individual Impact

- Build confidence in designing and managing governance M&E systems.
- Strengthen skills in Theory of Change, logframes, indicators, and data collection.
- Improve ability to analyze data and communicate findings.
- Gain practical tools for participatory and ethical M&E.
- Develop stronger capacity to use evidence for program improvement.

Work Impact

- Improve accountability and transparency in governance programs.
- Strengthen program monitoring, reporting, and learning.
- Support better decision-making through reliable evidence.
- Improve stakeholder engagement and ownership of M&E processes.
- Enhance program effectiveness by linking findings to practical improvements.

Training Methodology

This program combines M&E concepts with practical governance application through:

- Governance M&E case studies and real-world examples.
- Theory of Change and logical framework development exercises.
- Governance indicator design workshops.
- Data collection and data quality planning activities.
- M&E system implementation and reporting exercises.
- Participatory M&E, impact evaluation, ethics, and technology discussions.

Beyond the Course

Upon completion, participants will be able to:

- Develop customized M&E frameworks for governance programs.
- Create relevant governance indicators for tracking progress.
- Design M&E system implementation plans.
- Collect, analyze, and report governance program data.
- Use M&E findings to improve outcomes and accountability.
- Produce practical M&E reports based on real-world program evidence.
