Ref: 322799_214256 **Date:** 15 – 19 November 2027 **Location:** Madrid (Spain) **Fees:** 5200 GBP

Course Description

This intensive 1-week course examines the major macroeconomic challenges facing the global economy. Participants will explore key economic indicators, monetary and fiscal policies, international trade dynamics, and emerging trends. The course provides a comprehensive understanding of factors influencing global economic stability and equips professionals with tools to analyze macroeconomic trends and develop strategies to address global economic challenges.

Learning Objectives

- Analyze key global macroeconomic indicators and their implications for economic stability
- Evaluate the impact of monetary and fiscal policies on national and international economies
- Assess the dynamics of international trade and its effects on global economic growth
- Develop strategies to manage and mitigate macroeconomic risks in a global context
- Formulate policy recommendations to address current global economic challenges

Course Modules

Day 1: Introduction to Global Macroeconomic Challenges

- Overview of current global economic landscape
- Key macroeconomic indicators and their significance
- Historical perspective on global economic crises
- Emerging trends and future economic outlook

Day 2: Economic Growth and Development

- Theories of economic growth and development
- Factors driving economic disparities between nations
- Role of technology and innovation in economic growth
- Sustainable development and inclusive growth strategies

Day 3: Monetary Policy and Inflation

- Central banks and their role in economic stability
- Inflation targeting and interest rate policies
- Global differences in inflationary pressures and responses
- Monetary policy challenges in a globalized economy

Day 4: International Trade and Globalization

- Principles of international trade and comparative advantage
- Trade policies and their impact on global economies
- Exchange rates and international capital flows
- Managing trade imbalances and promoting fair trade

Day 5: Macroeconomic Risk Management and Policy Formulation

- Identifying and assessing global macroeconomic risks
- Strategies for managing economic uncertainty
- Policy options for enhancing global economic stability
- Case studies in successful macroeconomic management

Practical Wins for Participants

- Enhanced ability to interpret global economic trends and their potential impacts on business operations
- Improved decision-making skills for developing strategies in response to macroeconomic challenges
- Expanded toolkit for assessing and mitigating economic risks in a global context
- Strengthened capacity to contribute to organizational policy discussions on global economic issues
