Oil & Gas Procurement and Supply Chain Management Course

Ref: 322950_219964 **Date:** 23 – 27 May 2027 **Location:** Online **Fees:** 2200 GBP

Course Description

This intensive 1-week course provides a comprehensive overview of procurement and supply chain management in the oil and gas industry. Participants will gain insights into strategic procurement practices, supply chain optimization, risk management, and industry-specific challenges. The course blends theoretical knowledge with practical applications to enhance operational efficiency and cost-effectiveness.

Learning Objectives

- Master procurement strategies specific to the oil and gas sector
- Optimize supply chain operations for improved efficiency
- Develop risk management skills for complex supply chains
- Understand regulatory compliance in oil and gas procurement
- Implement cost reduction techniques while maintaining quality
- Enhance supplier relationship management skills

Course Modules

Day 1: Introduction to Oil & Gas Supply Chains

- Overview of the oil and gas industry value chain
- Key components of supply chains in oil & gas
- Industry trends and challenges
- Strategic procurement in oil and gas

Day 2: Procurement Strategies and Best Practices

- Category management in oil and gas procurement
- Global sourcing and local content requirements
- Supplier evaluation and selection
- Contract management and negotiation

Day 3: Supply Chain Optimization

- Inventory management and demand forecasting
- Logistics and transportation in oil and gas
- Warehouse management and distribution
- Supply chain digitalization and automation

Day 4: Risk Management and Compliance

- Supply chain risk assessment and mitigation
- Regulatory compliance in oil and gas procurement
- Health, safety, and environmental considerations
- Crisis management and business continuity planning

Day 5: Performance Measurement and Continuous Improvement

- Key performance indicators for procurement and supply chain
- Benchmarking and best practices
- Continuous improvement methodologies
- Case studies and practical applications

Practical Wins for Participants

- Develop a strategic procurement plan for your organization
- Create a risk management framework for your supply chain
- Implement cost-saving measures in your procurement processes
- Establish a performance measurement system for your supply chain operations
