Comprehensive Natural Gas & LNG Trading Risk Management

Ref: 322959_220111 **Date:** 7 – 11 December 2026 **Location:** Paris (France) **Fees:** 5900 GBP

Course Description

This intensive 1-week course provides a comprehensive overview of natural gas and LNG trading, focusing on risk management strategies. Participants will gain in-depth knowledge of global gas markets, pricing mechanisms, portfolio optimization, and hedging techniques. The course combines theoretical concepts with practical case studies to ensure a well-rounded understanding of the industry.

Learning Objectives

- Understand global natural gas and LNG market dynamics
- Master various pricing mechanisms and contract structures
- Develop effective trading strategies and portfolio management skills
- Implement risk management and hedging techniques
- Analyze market trends and make informed trading decisions
- Navigate regulatory frameworks and compliance requirements

Course Modules

Day 1: Introduction to Natural Gas and LNG Markets

- Global natural gas and LNG market overview
- Supply and demand dynamics
- Key players and market participants
- Regulatory frameworks and compliance

Day 2: Pricing Mechanisms and Contract Structures

- Gas and LNG pricing models
- Long-term vs. short-term contracts
- Price indexation and benchmarks
