Ref: 322978_220696 **Date:** 14 – 18 December 2026 **Location:** Barcelona (Spain) **Fees:** 5200 GBP

Course Description

This comprehensive 5-day course equips construction professionals with essential skills for effective site management and supervision. Participants will learn to control project costs, manage schedules, ensure safety compliance, and lead teams efficiently. The course covers practical techniques for successful project delivery and risk mitigation.

Learning Objectives

- Develop strategies for efficient site organization and resource management
- Master techniques for schedule control and progress monitoring
- Learn to implement robust safety management systems
- Enhance skills in team leadership and stakeholder communication
- Understand methods for quality control and cost management

Course Modules

Day 1: Site Organization and Safety Management

- Project participants and their roles
- Site layout and logistics planning
- Safety regulations and compliance
- Risk assessment and mitigation strategies

Day 2: Project Planning and Scheduling

- Work breakdown structures
- Critical path method CPM scheduling
- Resource allocation and optimization
- Progress monitoring and reporting

Day 3: Quality Control and Cost Management

- Quality assurance procedures
- Inspection and testing protocols
- Cost estimation and budgeting
- Change order management

A graphic illustration of a chessboard with several chess pieces. A large gold king piece is prominent in the foreground, with a silver pawn and a gold pawn nearby. The background shows concentric circles emanating from behind the king piece, suggesting a strategic or leadership theme.

Day 4: Team Leadership and Communication

- Effective team building techniques
- Conflict resolution strategies
- Stakeholder management
- Progress meetings and reporting

Day 5: Project Control and Closeout

- Performance measurement and analysis
- Corrective action planning
- Claims and dispute resolution
- Project closeout and lessons learned

Practical Wins for Participants

- Ability to organize and manage construction sites more efficiently
- Skills to improve project scheduling and resource utilization
- Techniques to enhance safety compliance and risk management
- Strategies to lead teams effectively and improve stakeholder communication
