Architect Registration Examination (ARE) Preparation Course

Ref: 322984_220920 **Date:** 20 – 24 September 2027 **Location:** Paris (France) **Fees:** 5200 GBP

Course Description

This intensive 1-week course prepares architecture professionals for the Architect Registration Examination ARE 5.0. Covering all six divisions of the exam, participants will gain a comprehensive understanding of architectural practice, from project management to construction and evaluation. Through expert instruction and hands-on exercises, candidates will develop the knowledge and skills necessary to successfully navigate the ARE and advance their careers towards architectural licensure.

Learning Objectives

- Master the content and format of all six ARE 5.0 divisions
- Develop effective test-taking strategies for multiple-choice and case study questions
- Apply architectural principles to real-world scenarios and problem-solving tasks
- Gain confidence in managing projects, analyzing building systems, and ensuring public health, safety, and welfare
- Understand the legal and ethical responsibilities of licensed architects

Course Modules

Day 1: Practice Management & Project Management

- Business operations and financial management
- Human resources and legal responsibilities
- Project delivery methods and contracts
- Project scheduling and resource allocation

Day 2: Programming & Analysis

- Environmental and contextual conditions
- Codes, regulations, and site analysis
- Building program development
- Project feasibility and cost considerations

Day 3: Project Planning & Design

- Site design and building layout
- Building systems integration
- Sustainability and resilience
- Stakeholder collaboration and design communication

Day 4: Project Development & Documentation

- Integration of building materials and systems
- Construction documentation
- Project manual and specifications
- Coordination of consultants and engineering systems

Day 5: Construction & Evaluation

- Preconstruction activities and bidding
- Construction administration and observation
- Project closeout and post-occupancy evaluation
- Building performance assessment

Practical Wins for Participants

- Comprehensive study materials covering all ARE 5.0 divisions
- Practice exams and case studies simulating actual test conditions
- Personalized feedback on areas for improvement
- Networking opportunities with fellow exam candidates and instructors
