CLARB Certified Landscape Architect Professional Training

Ref: 322986_221068 **Date:** 12 – 16 July 2027 **Location:** Tokyo (Japan) **Fees:** 5900 GBP

Course Description

This intensive 1-week course prepares landscape architects for CLARB certification. Participants will gain comprehensive knowledge in project management, site analysis, design principles, and construction documentation. The course covers all aspects of professional landscape architecture practice, ensuring readiness for certification exams and real-world projects.

Learning Objectives

- Master project and construction management techniques for landscape architecture
- Develop proficiency in site inventory, analysis, and design processes
- Learn advanced grading, drainage, and construction documentation skills
- Understand and apply relevant codes, regulations, and permitting requirements
- Gain expertise in sustainable and ecological landscape design practices

Course Modules

Day 1: Project and Construction Management

- Pre-project planning and scope definition
- Project scheduling and budgeting
- Contract negotiation and administration
- Construction oversight and quality control

Day 2: Site Inventory and Analysis

- Data collection and contextual analysis
- Environmental and ecological assessments
- Stakeholder engagement and input gathering
- Regulatory compliance and permitting

Day 3: Design Principles and Process

- Conceptual and schematic design development
- Master planning and site design techniques
- Sustainable and resilient design strategies
- Visual communication and presentation methods

Day 4: Grading, Drainage, and Technical Documentation

- Site grading and earthwork calculations
- Stormwater management and drainage design
- Construction detailing and specifications
- Digital tools for technical documentation

Day 5: Professional Practice and Certification Preparation

- Ethical considerations in landscape architecture
- Business management and client relations
- CLARB exam structure and preparation strategies
- Case studies and practical application exercises

Practical Wins for Participants

- Gain confidence in managing complex landscape architecture projects
- Develop a comprehensive toolkit for site analysis and design
- Enhance technical skills in grading, drainage, and construction documentation
- Prepare effectively for CLARB certification exams and professional advancement
