# Contractor Safety Management: Ensuring Workplace Excellence

**Ref:** 323007_221744 **Date:** 12 – 16 September 2027 **Location:** Istanbul (Turkey) **Fees:** 4900 GBP

## Course Description

This intensive 1-week course provides comprehensive training on contractor safety management. Participants will learn essential skills for effectively managing contractor safety, from pre-qualification and selection to on-site management and performance evaluation. The course covers legal requirements, risk assessment, communication strategies, and best practices in contractor safety management.

## Learning Objectives

- Understand legal responsibilities and requirements in contractor safety management
- Develop effective contractor selection and pre-qualification processes
- Learn to create and implement comprehensive contractor safety programs
- Master techniques for monitoring and evaluating contractor safety performance
- Gain skills in effective communication and collaboration with contractors
- Understand risk assessment and mitigation strategies in contractor management

## Course Modules

### Day 1: Foundations of Contractor Safety Management

- Legal framework and responsibilities
- Key principles of contractor safety management
- Risk assessment in contractor operations
- Developing a contractor safety policy

### Day 2: Contractor Selection and Pre-Qualification

- Contractor selection criteria and processes
- Safety pre-qualification methods
- Evaluating contractor safety records and programs
- Contract development and safety clauses

### Day 3: On-Site Contractor Management

- Site-specific safety orientations and training
- Permit-to-work systems
- Contractor supervision and monitoring
- Managing multi-contractor worksites

### Day 4: Communication and Collaboration

- Effective safety communication strategies
- Conducting contractor safety meetings
- Incident reporting and investigation
- Conflict resolution in contractor management

### Day 5: Performance Evaluation and Continuous Improvement

- Key Performance Indicators KPIs for contractor safety
- Auditing contractor safety performance
- Implementing corrective actions
- Continuous improvement in contractor safety management

## Practical Wins for Participants

- Develop a comprehensive contractor safety management program
- Create effective contractor pre-qualification and selection processes
- Implement strategies for improved on-site contractor safety management
- Establish a system for ongoing evaluation and improvement of contractor safety performance
