Course Description

This intensive 5-day course equips business leaders with the knowledge and tools to strategically manage operations for optimal performance. Participants will learn to align operational activities with organizational goals, implement cutting-edge process improvements, and make data-driven decisions to enhance efficiency and competitiveness.

Learning Objectives

- Develop a strategic approach to operations management aligned with business goals
- Master techniques for process optimization and continuous improvement
- Enhance decision-making skills using data analytics and performance metrics
- Learn to effectively manage supply chains and stakeholder relationships
- Gain insights into emerging trends and technologies in operations management

Course Modules

Day 1: Foundations of Strategic Operations Management

- Introduction to strategic operations management
- Aligning operations with business strategy
- Competitive priorities and performance objectives
- Analyzing the value chain

Day 2: Process Design and Improvement

- Process mapping and analysis
- Lean operations and Six Sigma methodologies
- Quality management systems
- Continuous improvement strategies

Day 3: Supply Chain Management and Logistics

- Strategic sourcing and procurement
- Inventory management and optimization
- Distribution network design
- Managing global supply chains
