Ref: 328825_229107 **Date:** 8 – 12 November 2027 **Location:** Barcelona (Spain) **Fees:** 5200 GBP

Why This Course

In an increasingly competitive global marketplace, quality is the foundation of trust, efficiency, and customer satisfaction.

A robust Quality Management System QMS provides the structure for consistent performance, continuous improvement, and compliance with international standards.

The Quality Management Systems program equips participants with the knowledge, tools, and frameworks to design, implement, and manage an effective QMS across any organization.

It blends ISO 9001 principles, quality assurance practices, and process-based management to ensure excellence, sustainability, and operational efficiency.

Through real-world case studies and practical workshops, participants will learn how to transform quality systems from compliance-driven frameworks into strategic enablers of organizational performance.

What You'll Learn and Practice

By joining this program, you will:

- Understand the principles, structure, and requirements of ISO 9001:2015.
- Learn to design, implement, and maintain a process-based Quality Management System.
- Develop effective quality policies, objectives, and documentation frameworks.
- Apply risk-based thinking and continuous improvement methodologies.
- Strengthen auditing, monitoring, and performance measurement skills.
- Align QMS with organizational strategy, customer expectations, and compliance goals.
- Build a culture of quality, accountability, and continuous improvement.
- Prepare for QMS certification and external audit readiness.

The Program Flow
