Capital Markets Professional Training

Ref: 328836_229695 **Date:** 17 – 21 May 2027 **Location:** Casablanca (Morocco) **Fees:** 4200 GBP

Why This Course

Global capital markets form the backbone of modern economies, facilitating the flow of capital, risk management, and investment opportunities across borders. Understanding how these markets operate — from equities and fixed income to derivatives and alternative investments — is essential for professionals involved in finance, trading, regulation, and corporate strategy.

Capital Markets Professional Training provides an in-depth exploration of market structures, instruments, and dynamics, integrating analytical insight with practical exposure. Participants gain a strong command of how capital markets function, how instruments are priced and traded, and how financial institutions manage risk, liquidity, and compliance in a rapidly evolving environment.

What You'll Learn and Practice

By joining this program, you will:

- Understand the structure and key participants of global capital markets.
- Learn the characteristics and valuation methods of equity, debt, and derivative instruments.
- Explore market mechanisms, trading platforms, and regulatory frameworks.
- Analyze macroeconomic, monetary, and risk factors influencing capital flows.
- Develop insights into portfolio management, asset allocation, and risk mitigation.
- Examine current trends shaping global financial markets, including digital assets and ESG investments.

The Program Flow

Day 1: Foundations of Global Capital Markets

- Overview of capital markets and their role in the financial system.
- Market types: primary vs. secondary, public vs. private.
- Key participants: issuers, investors, intermediaries, and regulators.
- Case study: how capital markets drive economic growth and innovation.

Day 2: Equity and Debt Instruments

- Understanding equities: shares, market indices, and valuation fundamentals.
- Debt markets: bonds, yield curves, and credit risk analysis.
- Fixed income strategies and interest rate dynamics.
- Workshop: analyzing a corporate bond issuance and pricing scenario.

Day 3: Derivatives, Risk Management, and Structured Products

- Derivative instruments: forwards, futures, options, and swaps.
- Hedging, speculation, and arbitrage strategies.
- Structured finance: securitization, CDOs, and credit derivatives.
- Practical exercise: building a simple derivatives-based risk management strategy.

Day 4: Market Operations, Trading, and Regulation

- Market infrastructure: exchanges, clearinghouses, and custodians.
- Order execution, settlement, and market liquidity mechanisms.
- Global regulatory landscape: Basel III, MiFID II, and SEC frameworks.
- Group activity: designing a compliant trading and reporting framework.

Day 5: Portfolio Strategy, ESG, and Emerging Trends

- Portfolio management fundamentals and performance measurement.
- Integrating ESG Environmental, Social, Governance into investment strategies.
- Digital transformation in capital markets: fintech, blockchain, and tokenization.
- Action workshop: building a capital markets investment strategy for a global portfolio.

Individual Impact

- Develop deep financial and analytical insight into global markets.
- Strengthen strategic decision-making in investment and risk management.
- Gain fluency in interpreting market data, instruments, and financial indicators.
- Build the confidence to navigate complex capital market environments.

Work Impact

- Improve financial performance through informed investment and funding decisions.
- Strengthen institutional risk governance and market compliance.
- Enable strategic access to global capital sources and instruments.
- Foster a forward-looking perspective on market innovation and financial technology.

Training Methodology

This program combines analytical learning, market simulation, and applied finance exercises to ensure mastery and practical relevance. Learning methods include:

- Interactive market simulations and trading scenarios.
- Real-world case studies from global financial institutions.
- Guided workshops on asset valuation and portfolio construction.
- Analytical toolkits for financial modeling and market analysis.
- Group discussions and scenario-based problem solving.

Beyond the Course

Upon completion, participants will be equipped with the knowledge, tools, and analytical mindset to operate effectively in today's global capital markets.

They will understand how to manage capital flows, risk exposure, and investment opportunities — driving informed decisions that balance growth, stability, and compliance in a dynamic financial world.
