The Complete Course on Inventory Management Excellence

Ref: 322159_234847 **Date:** 17 – 21 January 2027 **Location:** Riyadh (KSA) **Fees:** 4200 GBP

Why This Course

Effective inventory management is essential for balancing cost, availability, and operational efficiency. Poor inventory practices can lead to excess stock, shortages, and unnecessary financial pressure, while well-managed systems support smooth operations and stronger supply chain performance.

This comprehensive 1-week program is designed to provide professionals with advanced tools and practical techniques to manage inventory more effectively. It focuses on forecasting, optimization, and performance measurement—helping participants make better decisions and improve overall efficiency.

What You'll Learn and Practice

By joining this program, you will:

- Develop strategies to control and optimize inventory levels.
- Apply forecasting techniques to improve demand planning.
- Implement best practices in stock management and warehouse operations.
- Analyze inventory performance using key metrics.
- Enhance supply chain efficiency through improved inventory practices.
