Introduction to Bond Markets Qualification (IBMQ) Training

Ref: 322776_237199 **Date:** 7 – 11 December 2026 **Location:** Edinburgh (UK) **Fees:** 5200 GBP

Course Description

This comprehensive 1-week course provides a thorough introduction to global bond markets and fixed income analysis. Participants will gain a solid understanding of bond types, pricing mechanisms, yield curves, and market dynamics. The course covers government and corporate bonds, interest rate risk, credit analysis, and regulatory considerations.

Learning Objectives

- Understand the structure and key players in global bond markets
- Master bond pricing techniques and yield calculations
- Analyze interest rate risk and yield curve dynamics
- Evaluate credit risk and interpret credit ratings
- Explore primary and secondary market operations
- Gain insights into regulatory frameworks affecting bond markets

Course Modules

Day 1: Introduction to Fixed Income Markets
